Innovative Engineering & Strategic Manufacturing

## Established in 2017

Staqual born to provide a solution in a precision manufacturing with an innovative engineering at the world class cutting edge technology

## Staqual's Engineering Group

Staqual's Engineering Group provides the vast engineering solutions to the customers in various industrial domains including Aerospace, Automotive and Industrial. Engineering Group uses the state-of-art software for the engineering design & development. Engineering Group delivers the support to customer on reducing the development lead time by the strategic process approach with the right tools, effective cost reduction, reliable production and competitive in the market without compromising the quality & lead time.

## Staqual's Manufacturing Group

Staqual's Precision Manufacturing Group focus to machine the components from the volumes of one to thousands upon the customer requirements within the desired quality and the lead time. Precision Manufacturing Group uses the state-of-art CNC Machines, Conventional Machines and the Measuring Equipment for manufacturing the precision complex components. Staqual's PMG has the vast experience in manufacturing the various materials like Aluminum, Stainless Steel, Alloy Steel, Inconel, Titanium, etc. for the different domains including Aerospace, Automotive, Industrial. Staqual PMG specializes in manufacturing the tight tolerance parts up to 0.0002" in the production mode.

## Staqual's Quality Group

Staqual's Quality Group assures the quality of the each delivery comprises the various level of the project are well within the defined requirement of the customer. Quality Group is equipped with the state-of-the-art measuring instruments which are always duly calibrated and maintained in the climate controlled zone. Staqual Quality Group complies to the ISO 9001: 2015 methodologies to ensure the product quality is driven thru the system of an organization. Quality Group is directed to focus on the trust building with the customer for the delivered products from Staqual on every delivery.

## Our Vision

Staqual's vision is to become a world class organization in the precision components manufacturing and an ideal provider to the customer at various industrial domain

## Our Mission

Staqual's mission is to develop the business with the strategic approach in the manufacturing of the precision components and deliver the utmost quality to the customer on time.

## Our Goal

Staqual's goal is to have the sustainable growth in the business with the consistent performance and the effective continuous improvement on the entire business processes

## Engineering Solutions

- Conceptual Design for Manufacturability
- 3D Process Design & Drafting
- Jigs & Fixture Design
- Press Tool & Mold Design
- Turn Key Solutions for CNC Multi-Axis Machining
- CAM Programming & Advanced Simulation
- Legacy Data Conversion
- Advanced Production Documentation
- Manufacturing Data Management
- Advanced Tooling Design
- Gage Design
- Reverse Engineering
- Re-Engineering

## Facilities of Staqual

- High End CAD/ CAM Software
- State-of-the-art Conventional Machines
- High Tech Quality Measuring Equipments
- World Class CNC Machines
- Plug & Play – CNC Machining Resources
- Experienced Technicians & Engineers
- Climate Controlled Facility

## Key Highlights

- Innovative Engineering Techniques
- Strategic Manufacturing Methodologies
- Smart Production Management
- Deep Manufacturing Knowledge
- Cost Effective Approach
- Advanced Quality Management
- Contributing Success to the Customer thru effective continuous improvement

## Manufacturing

### Solutions

- Precision Conventional Machining
- Precision Jigs & Fixtures Manufacturing
- Press Tools & Mold Manufacturing
- Gage Manufacturing
- Precision CNC Multi Axis Machining
- Contract Machining (Job Work)
- Advanced Production Management

## Our Values

- Reliability
- Innovative
- Teamwork
- Respect
- Perform

## Quality Policy

Meet the customer's expectation with an effective quality management system thru continuous improvement, training and integrating the Quality Values in the Staqual's Business & Team

## Quality Objectives

- Implement the Competitive Cost Strategy
- Develop the Lean Manufacturing Techniques
- Enhanced Manufacturing Efficiency
- On-Time Delivery with Zero Defects
- Develop the skills of the Staqual Team thru training
- Contribute to the clean environment
